The compressed air service is available in exhibition pavilions 1 to 5 on all levels. Feria Valencia will supply the connection at the location, using pressure hoses with 13 mm. inner diameter and 19 mm. external diameter, sufficient for a supply of up to 1.500 litres / minute, with a ½ inch valve with screw thread. The connection to the supply and with machines is the responsibility and task of the exhibitor.

The exhibitor must indicate the volume it expects to consume in litres/minute, applying the coefficient of simultaneity it considers suitable.

The supply points and the connection points used by the exhibitor must be readily accessible at all times; that is to say, they can not be covered with any fixed element, such as column coverings, platforms or pavement. If these elements are being used, readily accessible registration covers must be available, which do not need special tools.

A minimum pressure of 8 bars is guaranteed at any point in the installation. The pressure should be regulated by the exhibitor in function of its needs and using its own means.

COMPRESSED AIR

Connection Points:

Total Estimated consumption: litres/minute

RATES (VAT not included) RATE 1 (ON TIME) RATE 2 (AFTER DEADLINE)

· Connection cost: T1 340 € T2 425 €
